

HARRIS PS-503A PORTABLE SHEAR

A FULLY SELF-CONTAINED 500 TON SHEAR

The introduction of our portable shear has attracted a great deal of interest. The PS-503A portable shear is a fully self-contained unit mounted on a tridem axle, designed for standard fifth wheel attachment for tractor-trailer transportation. Powered by a diesel engine, it is ideal for processing small volumes of scrap located in varied locations.

Development of the PS-503A incorporated features desired by processors that may lead to further expansion in the portable line of equipment.
